Dear HR Manager:

With a Bachelor's Degree in Computer Engineering, I have over 7 years of hands-on experience at the Finance and 6 months of experience on Telecommunication sector. During this time, I worked on dozens of projects using different programming languages and technologies on the backend and frontend projects.

Currently, I am working as full-stack Java developer at Garanti Technology. My objective is to be the best software engineer that I can be in the technology industry.

I have been involved in numerous large-scale software releases and understand the importance of time management and open communication. While it may be easy to focus on the technical side of work, I've found that being able to express concerns, roadblocks, and alternative solutions to colleagues of varying technical backgrounds have been invaluable in my professional development.

I am passionate in continued education and research and continue to seek new software and methods to assist with product development. I think this position is appropriate for me and I want to be part of your staff and writing future together. I truly believe that I can add value to your company.

Some courses I have got and conferences I have attended as follows;

Attending O'Reilly Software Architecture Conference / Oct. 2018 London

Attending SpringOne Tour Istanbul Conference / April 2019 - Sept. 2018

Attending Oracle Code Explore Istanbul / March 2019

Attending JavaDay Istanbul / March 2019

Become a certified Developing Enterprise Applications Using Spring.

Become a certified Effective Java Using Design Patterns.

I truly believe in continued education and research and continue to seek new software and methods to assist with product development. I hope to bring my knowledge, and future knowledge, to your organization.

Following pages are a copy of my resume that further explains my background and technical skills. I can be reached anytime via my cell phone, 0090 544 696 8124 or via email at ates.ibrahimhalil@gmail.com. Thank you for your time and consideration. I look forward to speaking with you more about this opportunity.

Best regards,

Ibrahim

MALTEPE / ISTANBUL / TURKEY

OBJECTIVE

Now, As professional I am working as full stack developer. My personal focus is on Cloud Technology and Mobile Development.

I've great passion to learn and working personally on these technologies.

EDUCATION

2008 – 2013
Yildiz Technical University / Computer Engineering

2004-2008
Cizre Ataturk High School

WORK EXPERIENCE

2014 – Current
Software Engineer
Garanti Technology BBVA Group

https://www.garantiteknoloji.com.tr/homepage.aspx

I worked with different teams at different units. Details given at following.

1- **Currently, I am working as Expert Software Engineer and member of Digital Credits and Publics of Digital Banking.**

   Our team developing a user friendly, innovative, fast and reliable web and mobile apps.

   Our team is responsible for garantibbva.com.tr and related public sites. Also we are responsible to develop Smart Assistance which details given in project section.

2- I've worked at Credits and Risk Unit between 2016 and 2019.

Our team is developing a software system for collecting credit back from risky customers, follow-up customer, cutting customer's accounts and products on bank's live system. Our focus is about customers who do not make a regular payment on the credit term. Also, law collection system was developed by our team which that's focused is if customers do not back pay never, then those customers following by lawyer on this system known as LCS(Law collection system).

3- I worked at the Treasury and Investment Unit between 2014 and 2016.

In this unit, our team was developing software for customers who want to invest in stocks, funds, and futures via the online banking system.

Some projects are I worked on as following;

1- Renewal garanti.com.tr
   About project: We are developing new form and apps to renewing Garanti.com.tr. We are using Spring boot and Java for backend side. AEM and Javascript and Lit-element using for frontend side. Also we are using Openshift for cloud, Splunk, Dynatrace, Kibana for logging and monitoring.

2- Smart Assistance(UGI)
   About project: smart assistance bot or as known UGI is AI based bot application project. Project has different layer and phase. The frontend project has been developed with mobile development(IOS and Android) and web(Javascript). Backend of project has been developed with microservice architecture(Java). Also, Backend side of project includes AI, Speech Recognition, Speech to Text and Text to Speech part(these are third party applications). We are using lots of tools in development like Openshift for cloud, Splunk, Dynatrace, Kibana for logging and monitoring. We are developing microservices with Spring boot.

3- Call Center Script Management
   About project: We have developed new application for Call Center new architecture. I've been in this project when Script Management part. This part is about automizing scripts which show to customer on call. We are using Spring boot and Java for backend side. AEM and Javascript and Lit-element using for frontend side. Also we are using Openshift for cloud, Splunk, Dynatrace, Kibana for logging and monitoring.

4- Collection of Commercial Credits
5- Tracking Customers' Insurance Bonus
6- I was a member software team to develop tracking POS account and GOSAS's claims
7- Using IFRS9 standard to collecting collateral
8- Stock Exchange Transfer Project
9- Customer Affluent Calculation and Reporting

Additionally, I also worked on other projects. If needed, details would be given.

June 2013 – December 2013
Software Developer
Alcatel-Lucent(Nokia)

I worked in Alcatel-Lucent for 6 months.

I developed some part of PAS Project using C# and Visual Studio. Also, some interfaces as following were used; CLI, SNMP, TL1, Telnet, and SQL. The important point of the project provides integration between two phases which are communicator and configurator phase.
Communicator is auditing Network Elements(NE) which are based on IMS. Configurator is automizing parameter configuration. Specifically, CTS NE configurator was developed.

June 2012 – September 2012
Software Intern at T. Finans Bank / https://www.turkiyefinans.com.tr/en-us/Pages/default.aspx
I did intern at ADC and Payment Systems. I developed a light android program. The aim of that program is showing the price of stocks.

I have developed some personal projects.

1- E-Tarim
We are four friends decide to developed this project. The project is about an online agriculture system. Our aim is to meet consumer and producer with each other on the online system. For consumer, access to agriculture products much easier and for the producer, selling agricultural products is much easier. Project supported by IBM and we joined the competition organized by IBM. In this project, we used .NET, C#, SQL Server.

2- The trajectory on GPS of SmartPhones
This project is our thesis project. And we are two friends to develop. We developed a mobile project on android devices.

3- GuncelMedya
I developed for Android devices. GuncelMedya is about daily news about political, sports, magazine, technology and so on.

If needed, details would be given also.

CONFERENCES

1- **Presenter; Microservices, Docker and Kubernetes Presentation at Garanti Technology**
2- **Attending Software Architecture Conference** by O'Reilly Oct. 2018 / London
3- **Attending Spring One Tour** by Pivotal Sept. 2018 / Istanbul

CERTIFICATES

Oct 2018
Effectiva Java Using Design Patterns
Etaration Co.

Jan 2016
Developing Enterprise Applications using Spring
Omega Training and Consultancy

Jan 2016
Java SE 7 Programming
Omega Training and Consultancy

Jan 2016
Developing RIA Using HTML5 and Js
Omega Training and Consultancy

PERSONAL SKILLS

- Patience
- Attentiveness
- Time management skills
- Persuasion skills
- Empathy

- Clear communication skills
- Ability to use positive language
- A calming presence
- Tenacity
- Willingness to learn / fast learner

TECHNICAL SKILLS

- OOP
- Java
- JavaScript, Lit Element
- Git / Bitbucket
- Spring Boot / Spring Framework
- Jenkins
- Microservices Architecture
- Docker, Openshift
- Swagger UI

- DB2 - Oracle
- IntelliJ / Eclipse
- Mockito, Junit **Testing**

Monitoring, Logging & Caching
- Dynatrace
- Splunk

HOBBIES & INTERESTS

I love reading the novel, walking, and swimming. I am a member of the swimming club at my company. I also fancier of psychoanalysis and philosophy.
